Estadísticas del número de usos de animales en investigación, enseñanza y otros fines

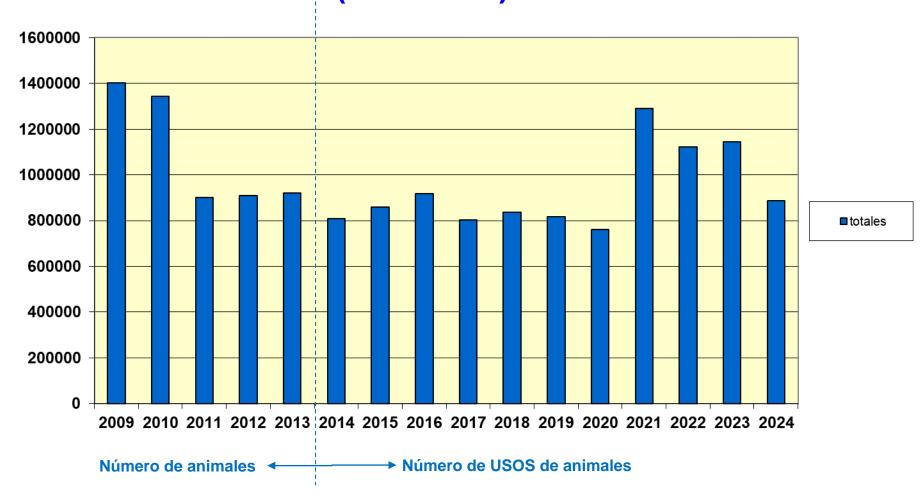

Año 2024

Fuente: MAPA

Gráficos: Lluís Montoliu (CSIC)

Número de (usos de) TOTALES de animales por año (2009-2024)

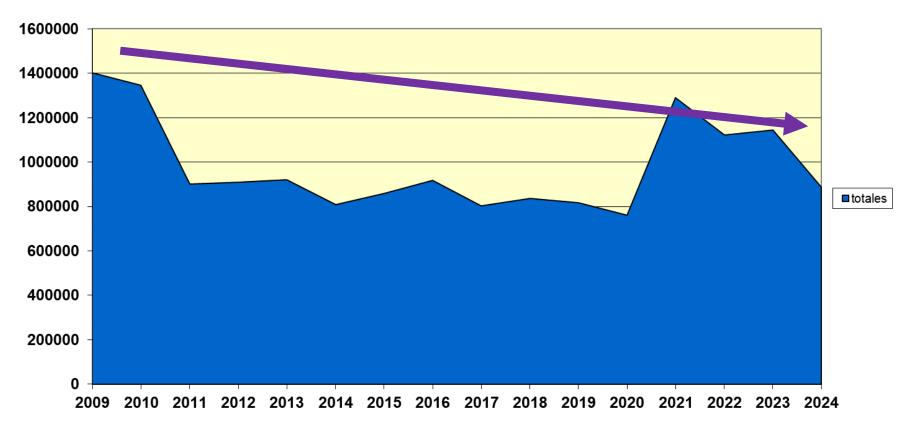

Reducción del -22,5% desde 2023

Reducción del -36,8% desde 2009

CON PECES

Número de (usos de) TOTALES de animales por año (2009-2024)

1.403.290 animales usados en 2009 887.241 usos de animales en 2024

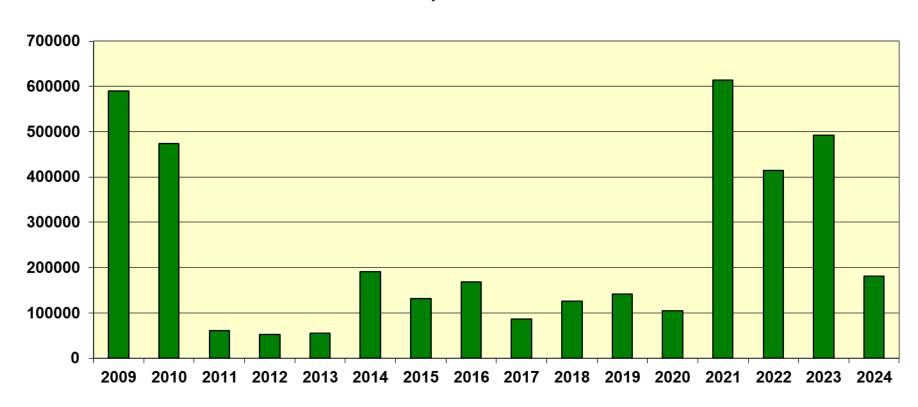

CON PECES

Reducción del -36,8% desde 2009

peces

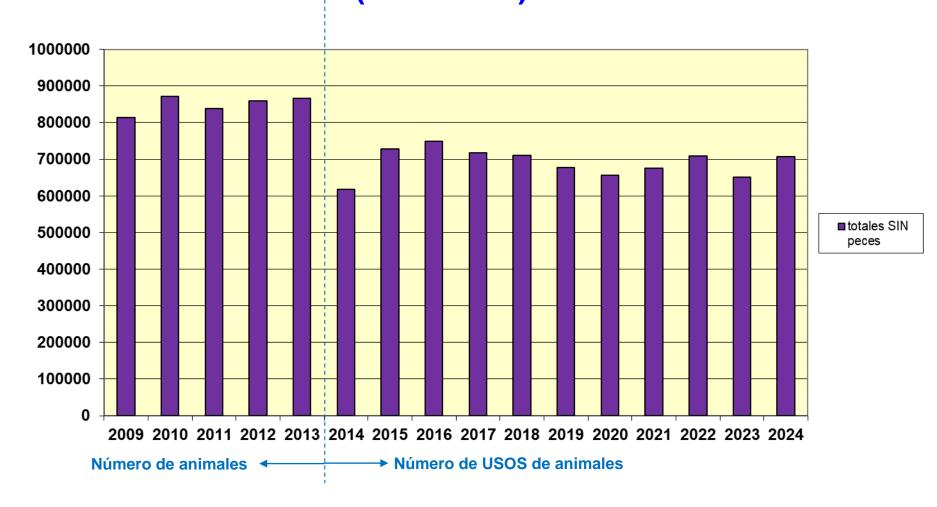

492.489 usos de peces en 2023 180.616 usos de peces en 2024

Fuente: MAPA

Reducción del -63,3% desde 2023

Número de (usos de) TOTALES de animales por año (2009-2024)

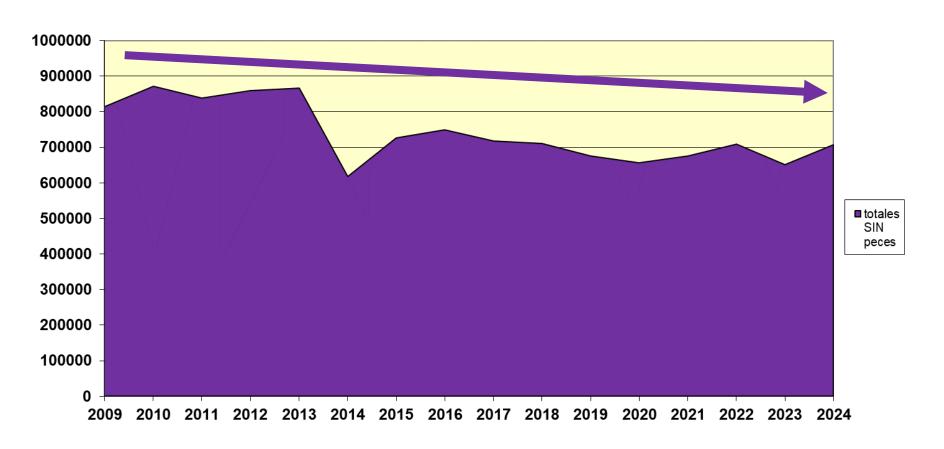

Aumento del +8,42% desde 2023

SIN PECES

Reducción del -13,14% desde 2009

Número de (usos de) TOTALES de animales por año (2009-2024)

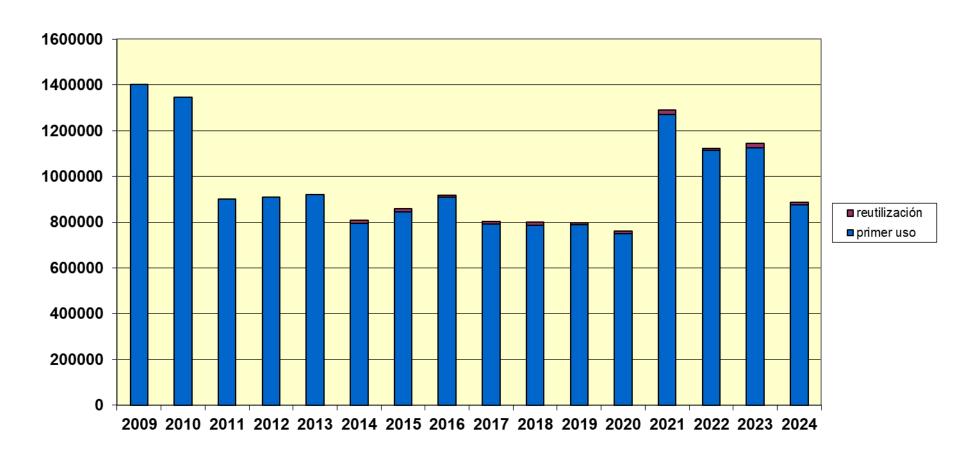

813.543 animales (sin peces) usados en 2009 706.625 usos de animales (sin peces) en 2024

SIN PECES

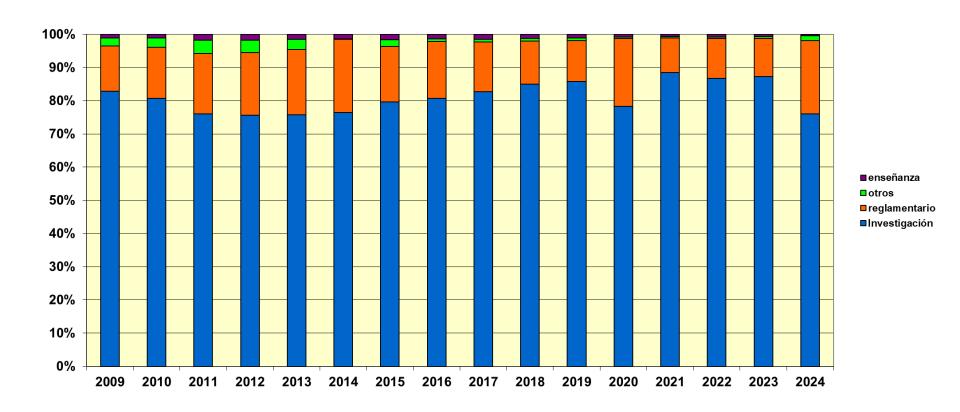

Fuente: MAPA Reducción del -13,14% desde 2009

Número de (usos de) animales por año (2009-2024) (primer uso / reutilización)

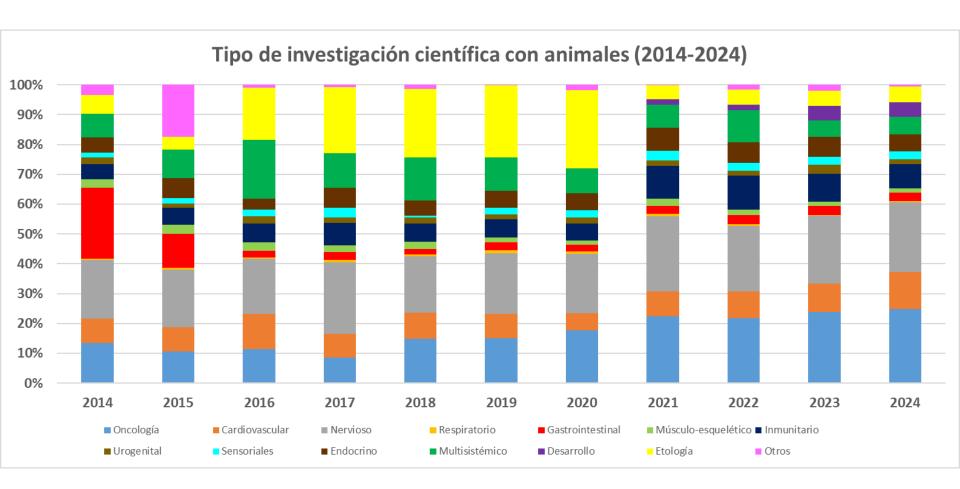

Solamente el 1,35% de los animales fueron reutilizados en 2024

FINALIDAD de (usos de) animales por año (2009-2024)

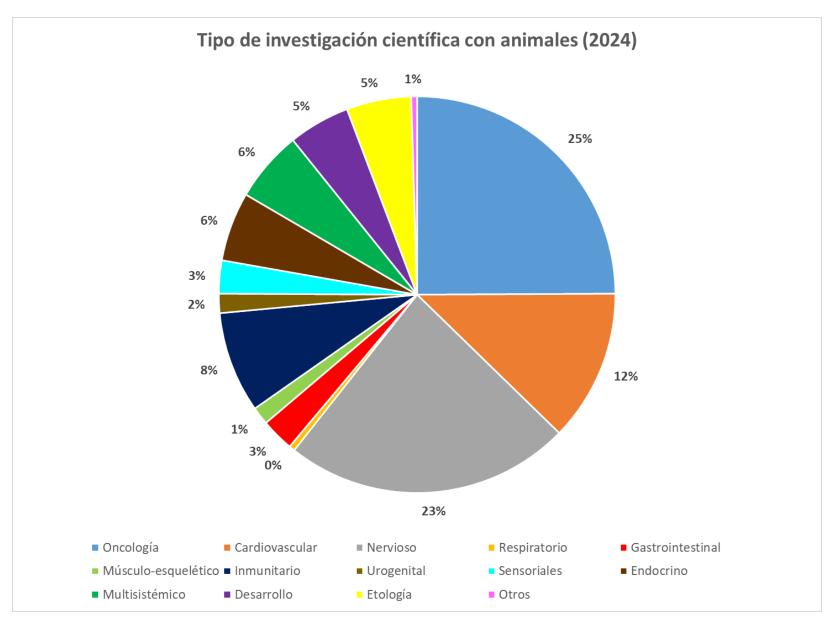

La gran mayoría de animales (76%) en 2024 se destinó a investigación y se destinó un 22,1% a usos reglamentarios

Usos de animales en disciplinas científicas por año (2014-2024)

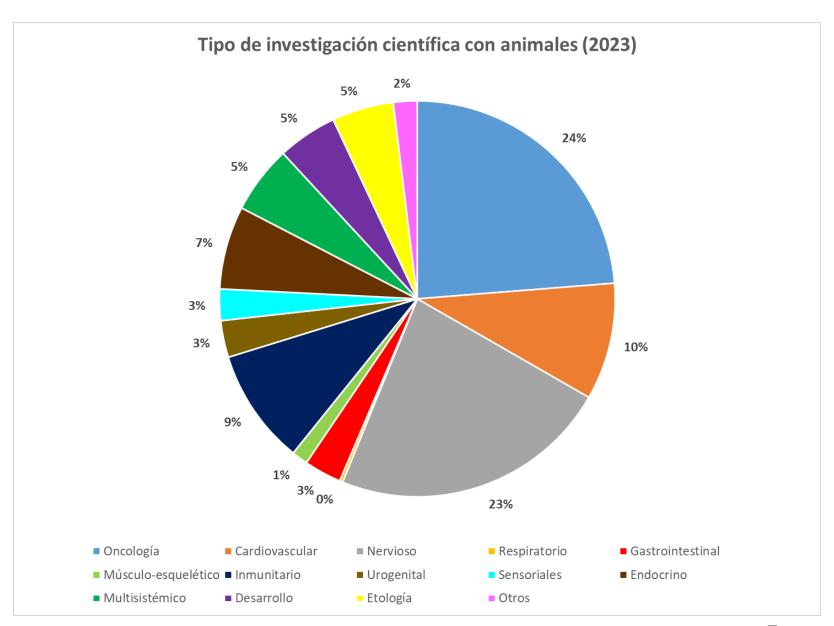

El mayor porcentaje de animales (~25%) se destinó en 2024 a estudios oncológicos

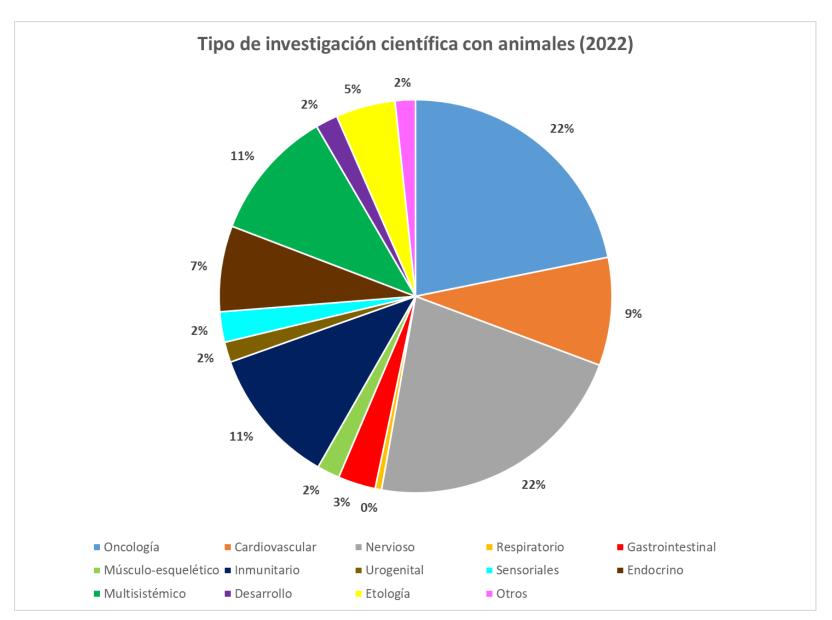

Usos de animales en disciplinas científicas (2024)

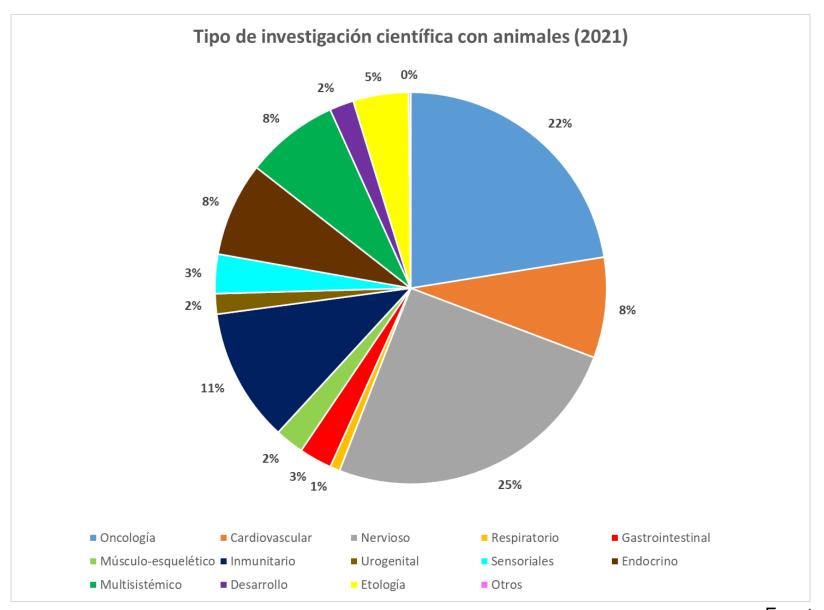

Usos de animales en disciplinas científicas (2023)

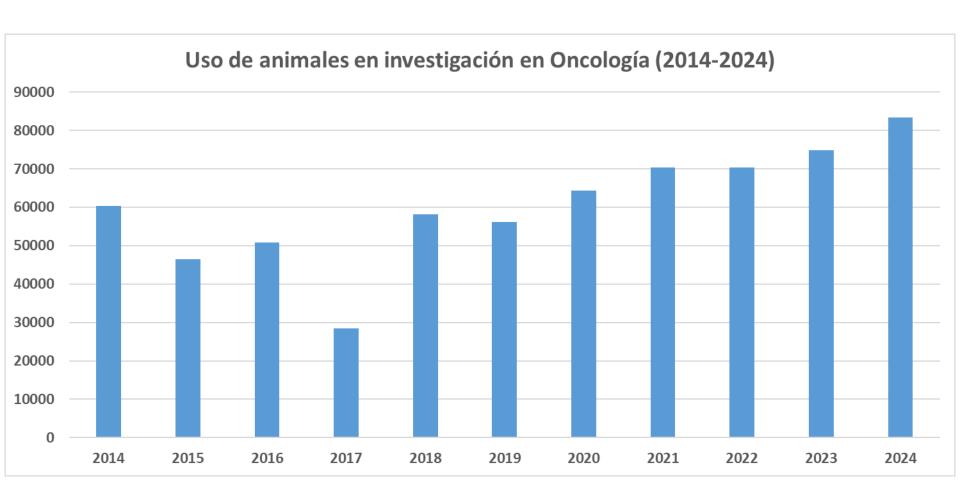

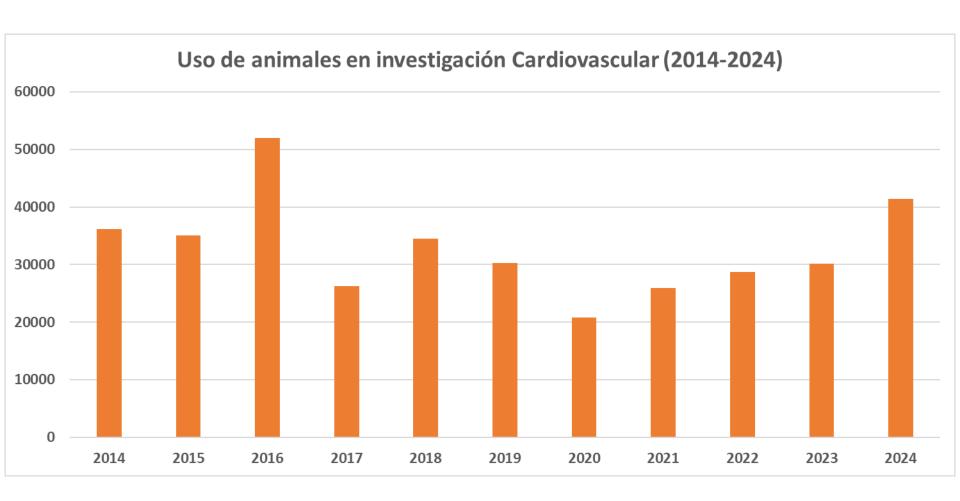

Usos de animales en disciplinas científicas (2022)

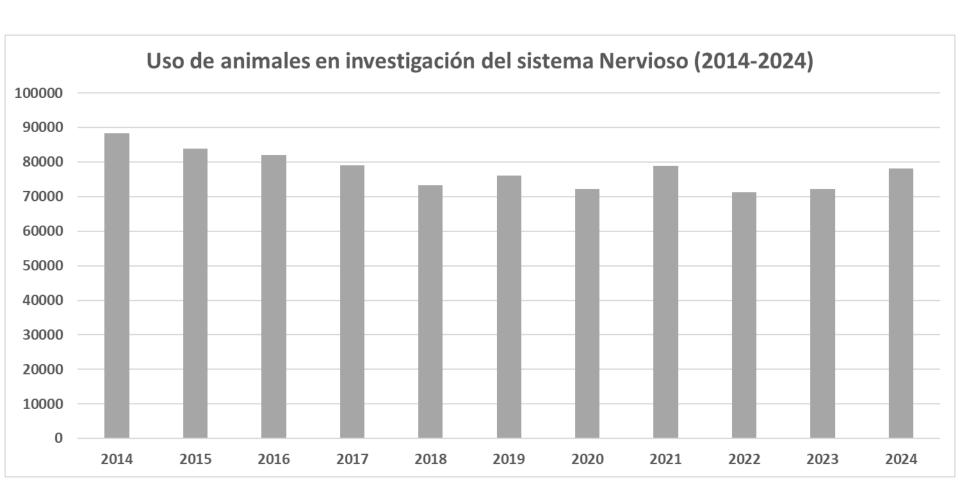

Usos de animales en disciplinas científicas (2021)

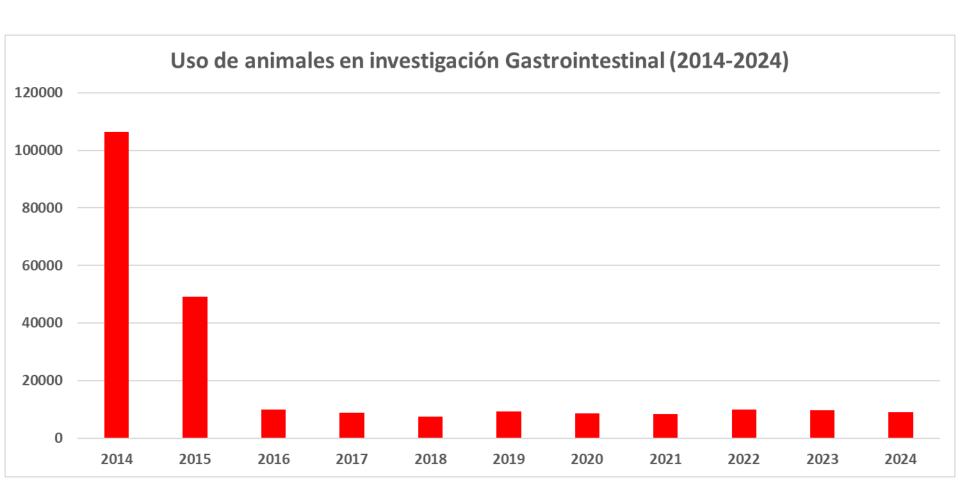

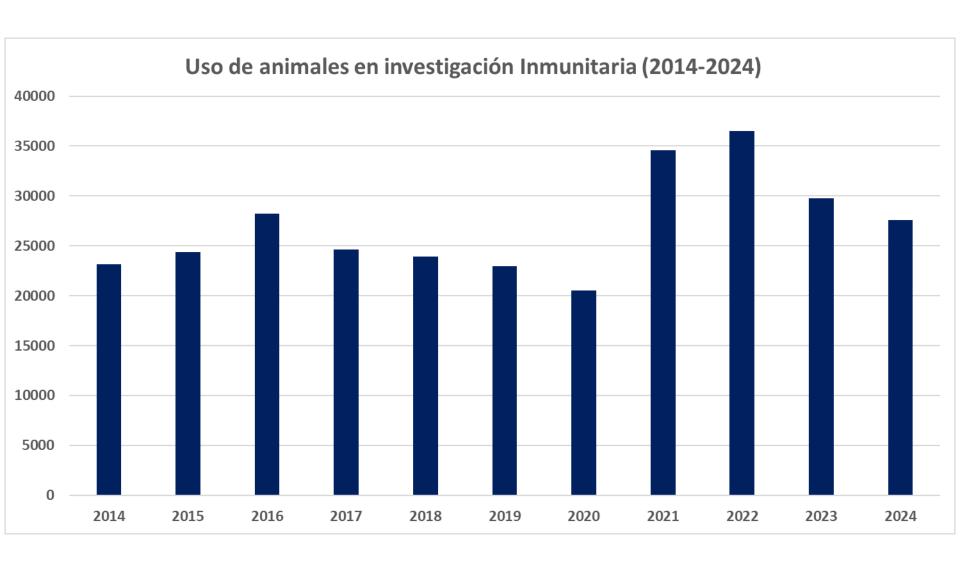

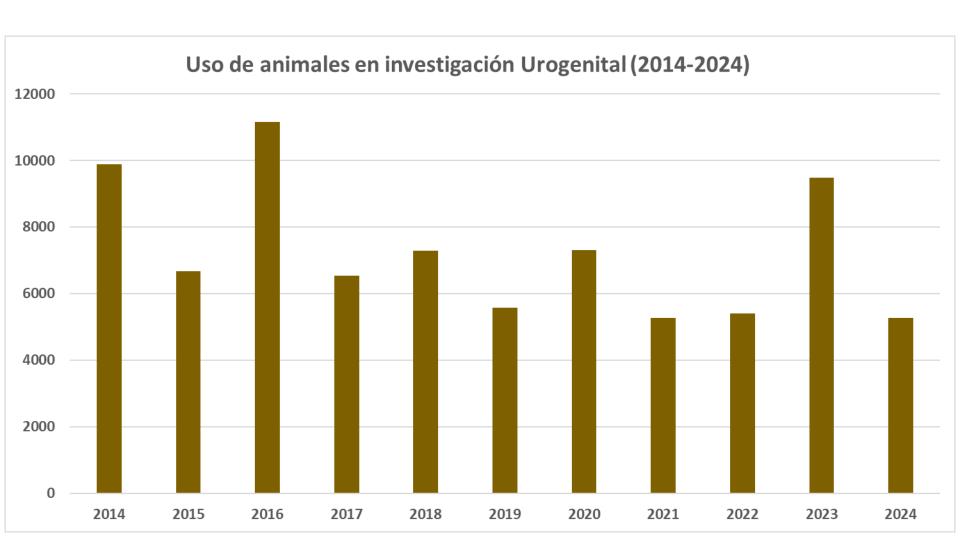

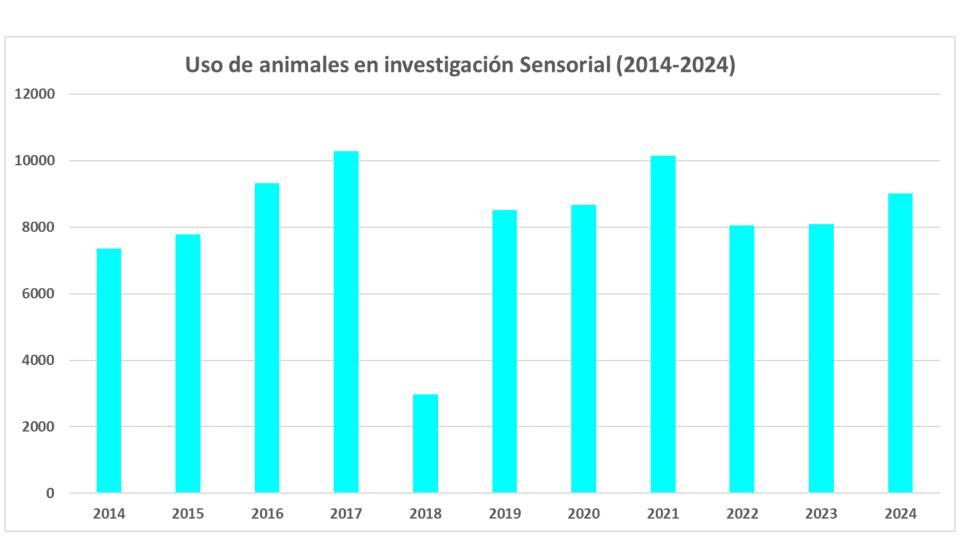

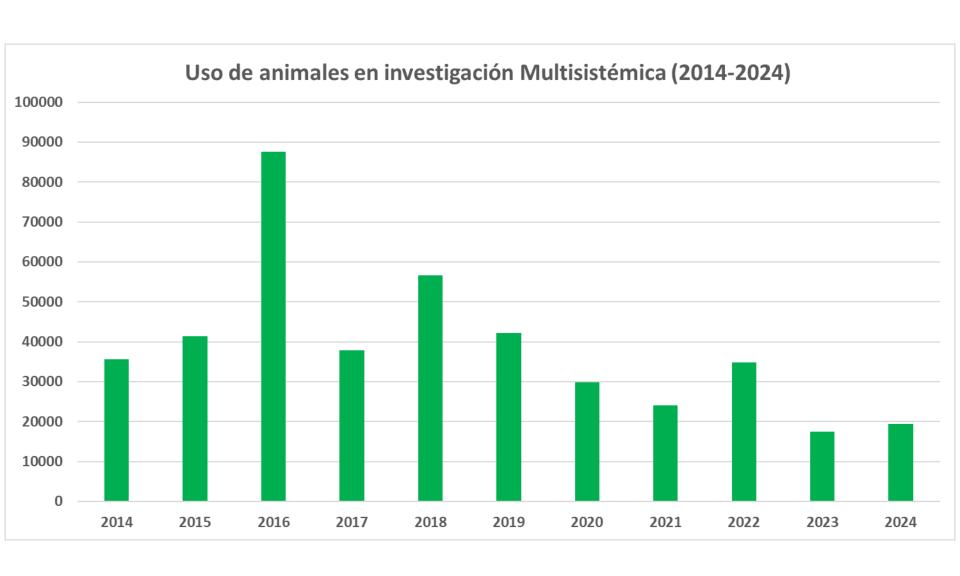

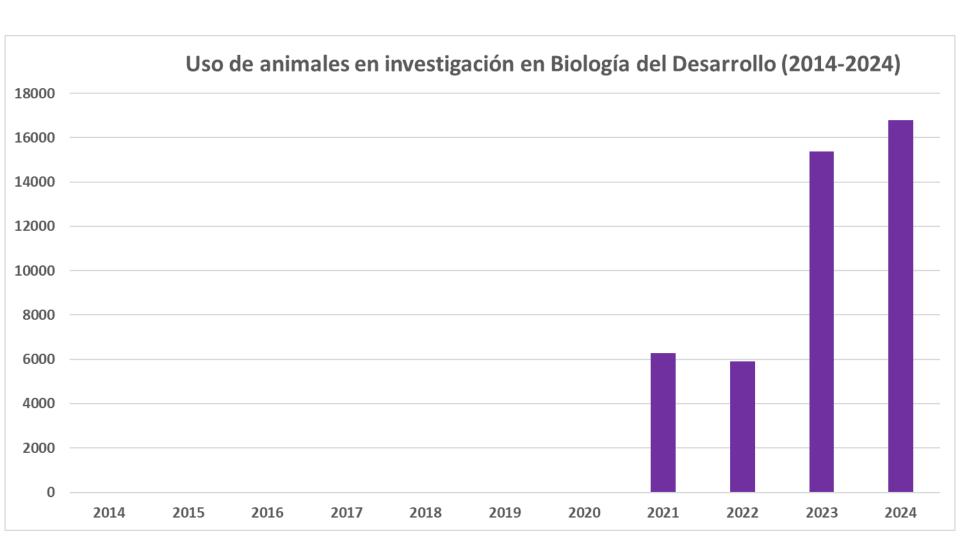

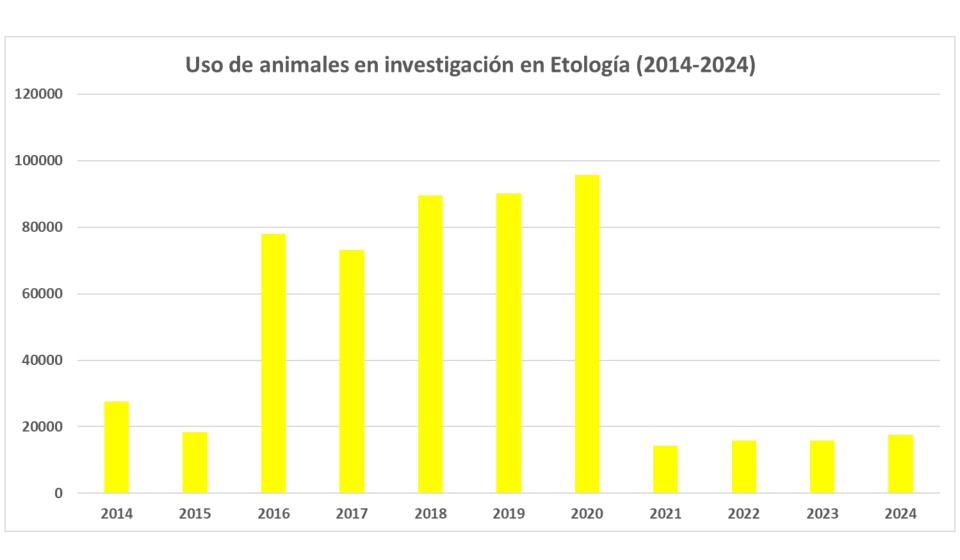

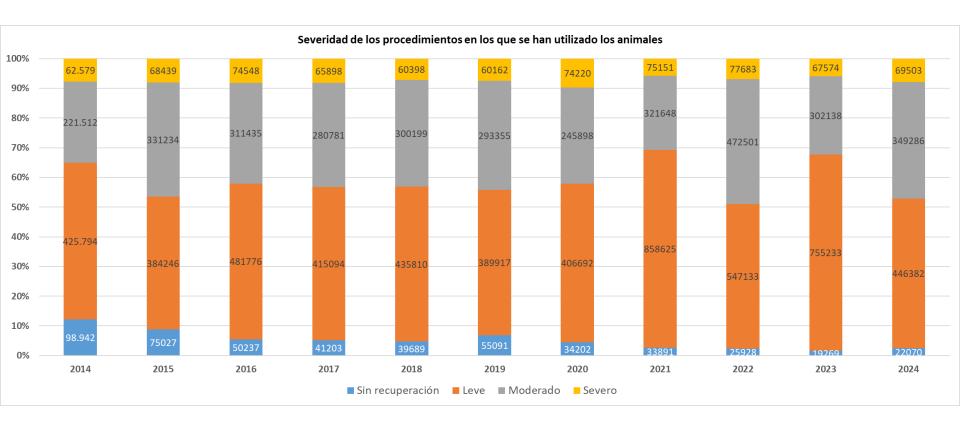

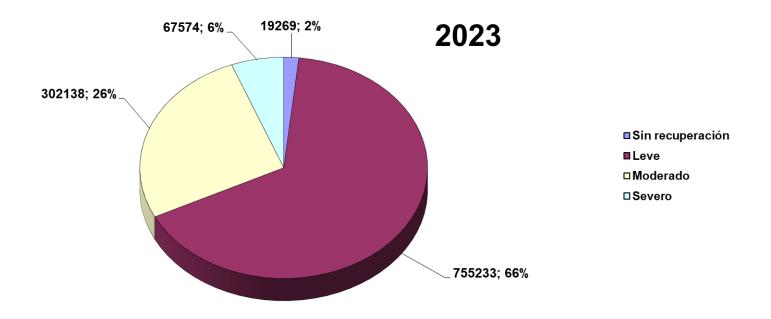

Severidad de los Procedimientos (2014-2024)

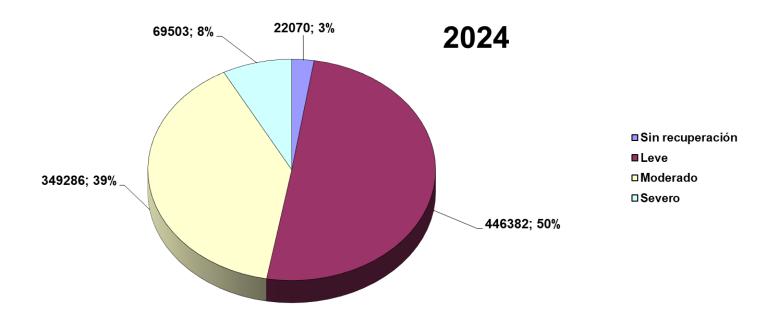

Porcentajes muy similares 89% de procedimientos son leves o moderados 8% de procedimientos son severos

Severidad de los Procedimientos (2023)

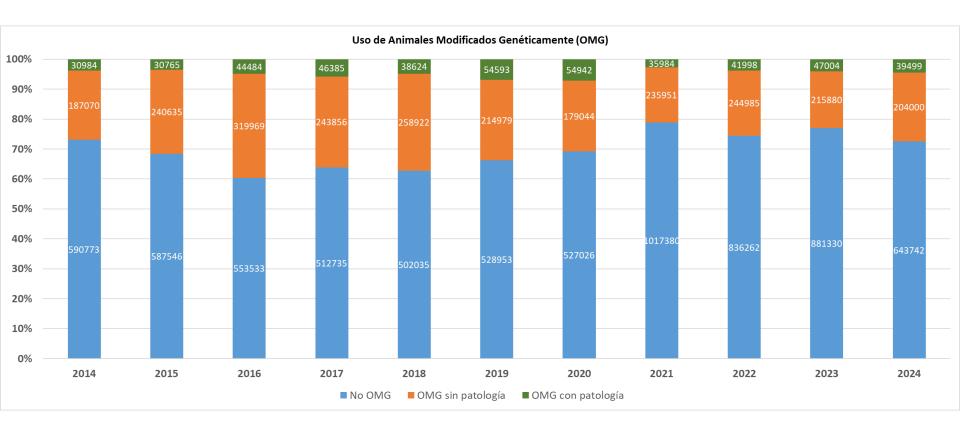

92% de procedimientos son leves o moderados 6% de procedimientos son severos 2% de procedimientos son sin recuperación

Severidad de los Procedimientos (2024)

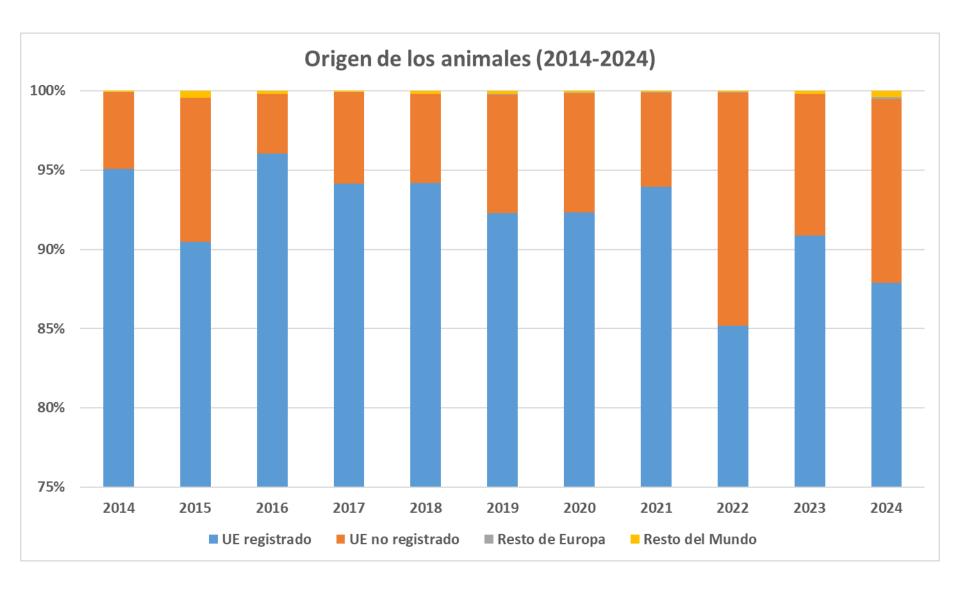

89% de procedimientos son leves o moderados 8% de procedimientos son severos 3% de procedimientos son sin recuperación

Uso de Animales Modificados Genéticamente (2014-2024)

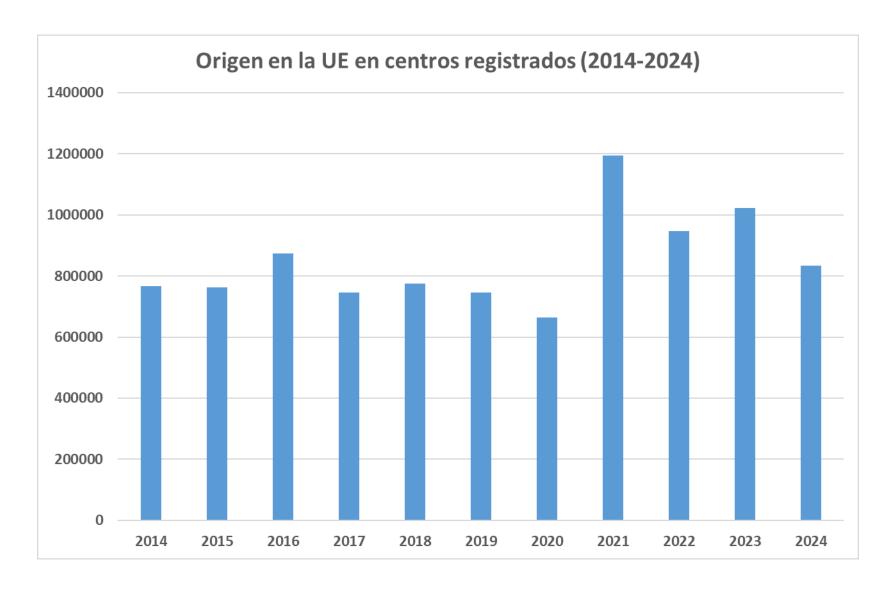

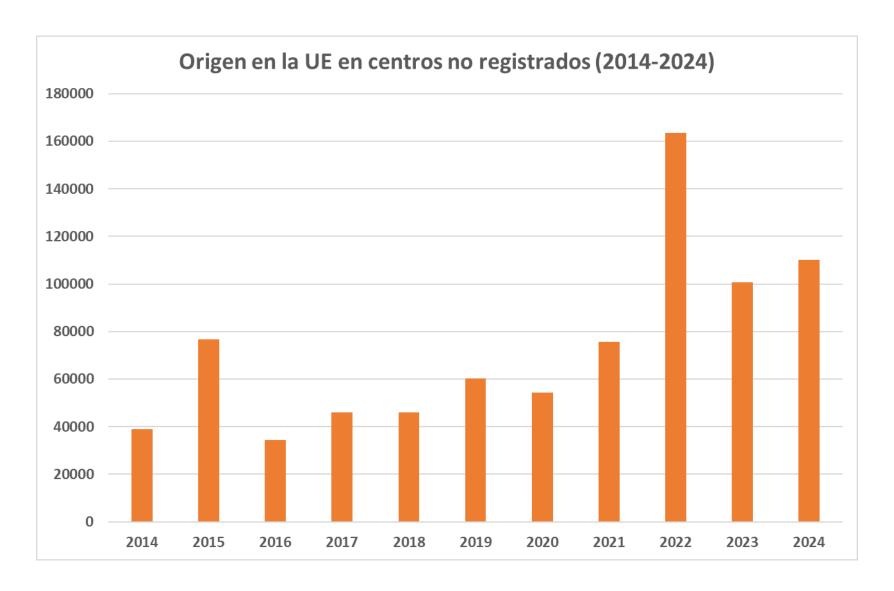

En 2024

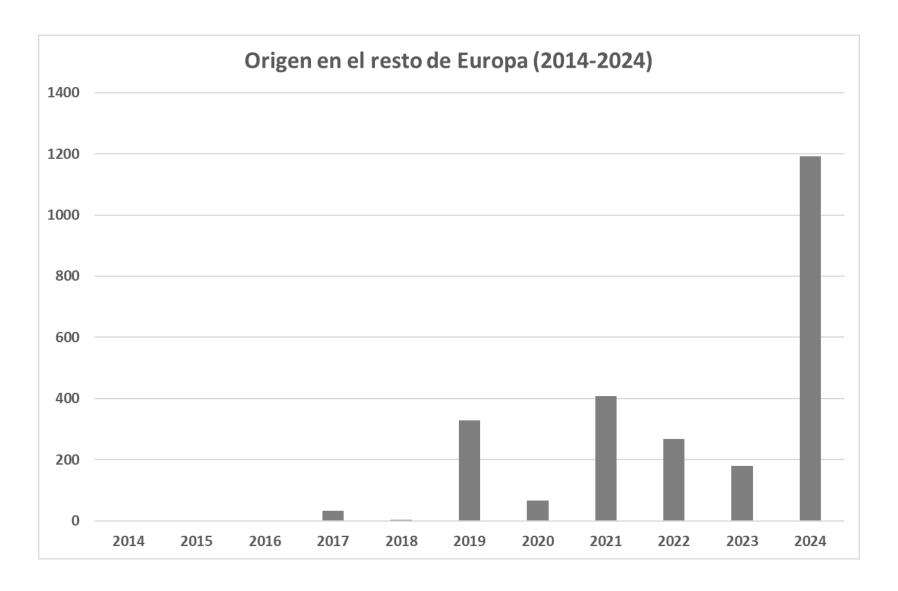

73% no son OMG 23% son OMG sin patología 4% son OMG con patología

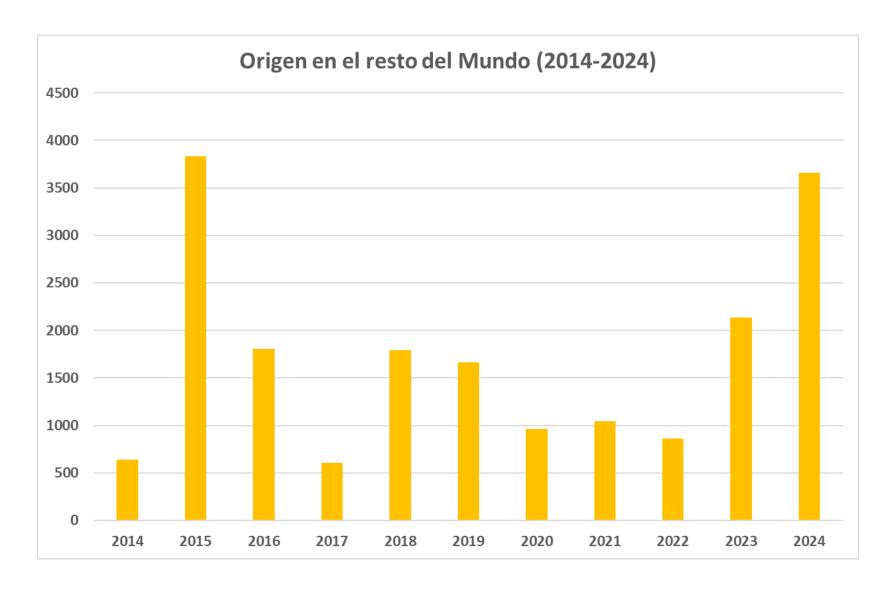

La mayoría de animales usados (~94%) vienen de centros registrados de la UE

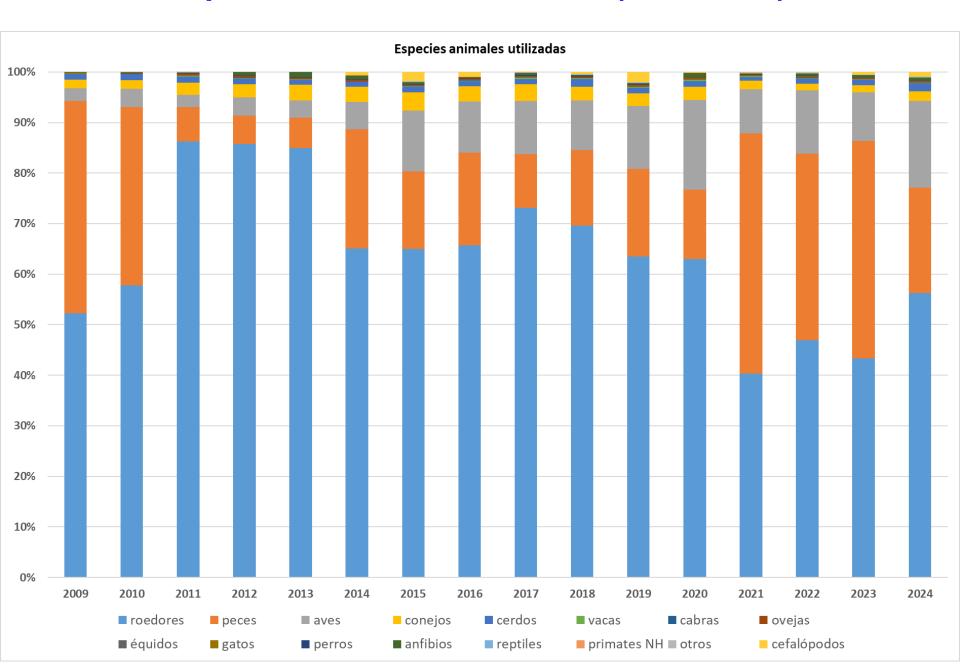

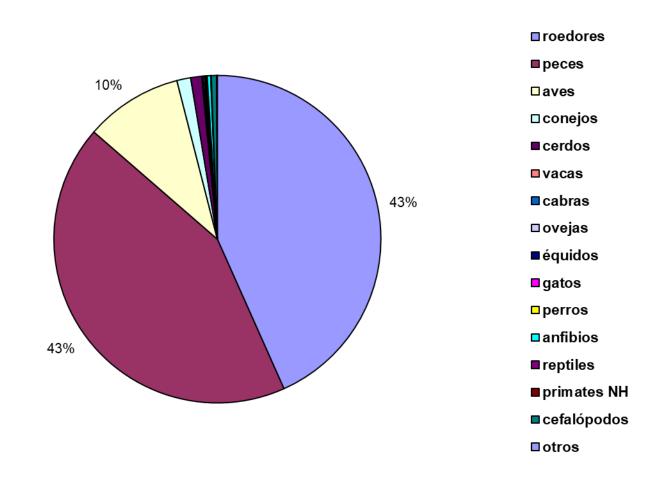

Especies animales utilizadas (2009-2024)

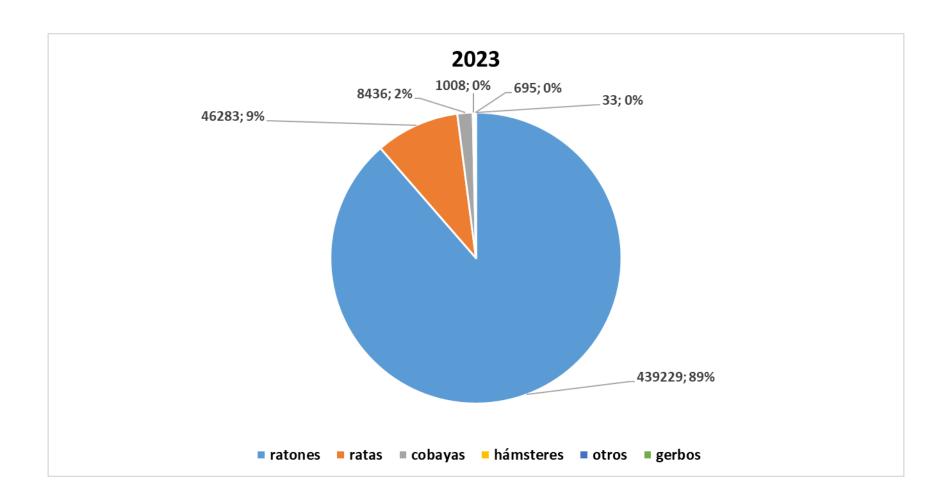

Especies animales utilizadas (2023)

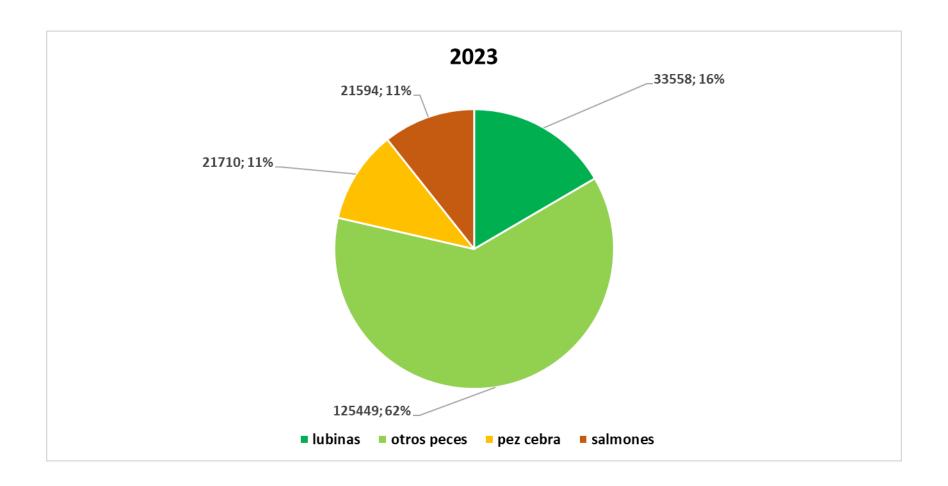

Roedores usados en 2023

La gran mayoría de roedores usados (89%) son ratones

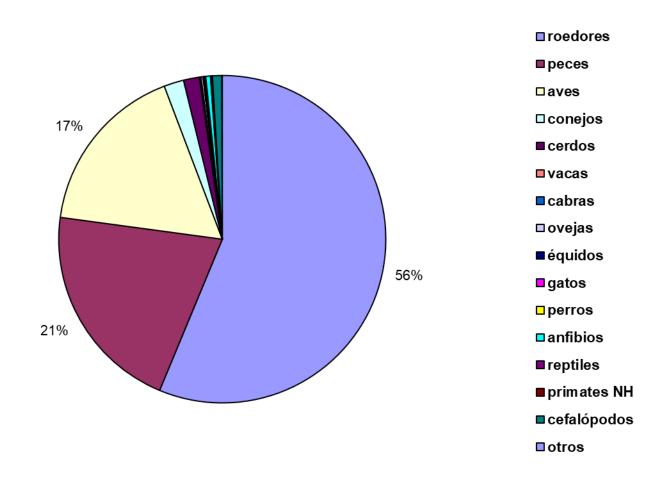

Peces usados en 2023

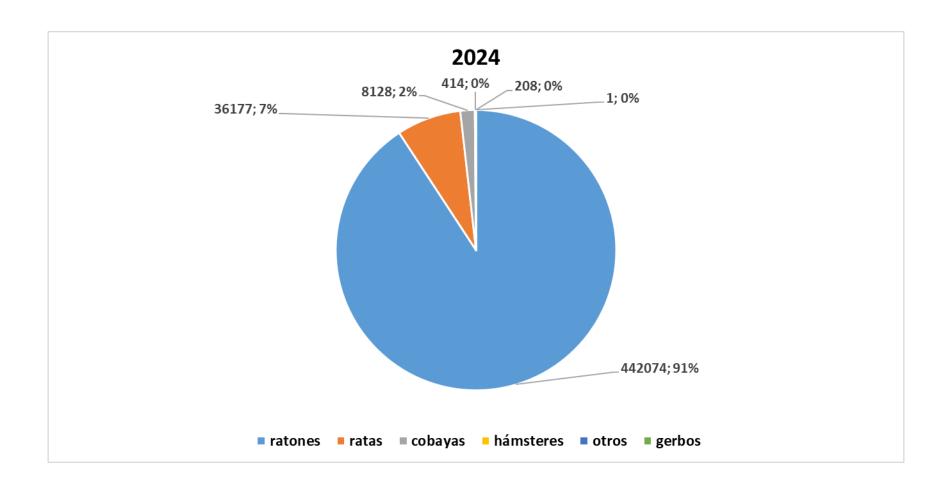

La gran mayoría de peces usados (62%) son "otros peces"

Especies animales utilizadas (2024)

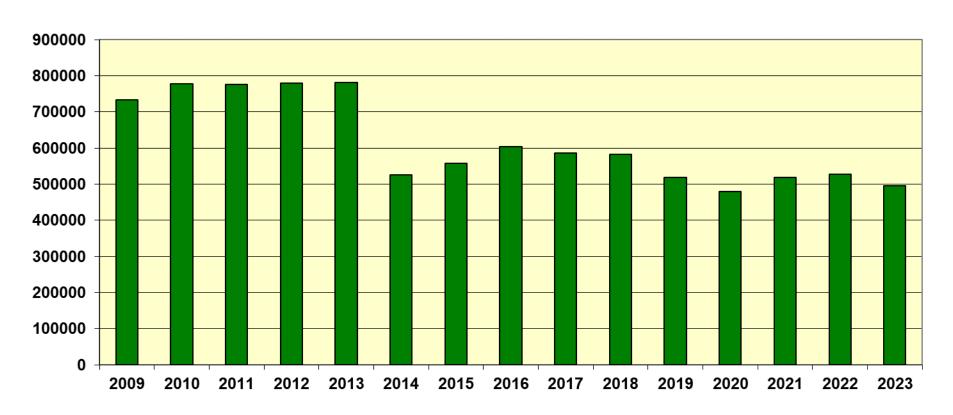

Roedores usados en 2024

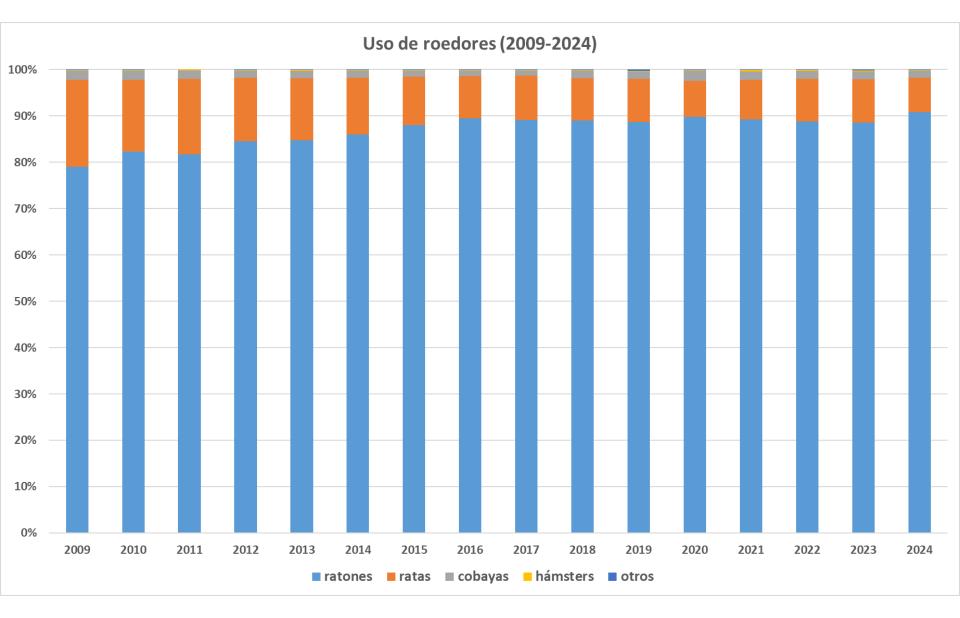

La gran mayoría de roedores usados (91%) son ratones

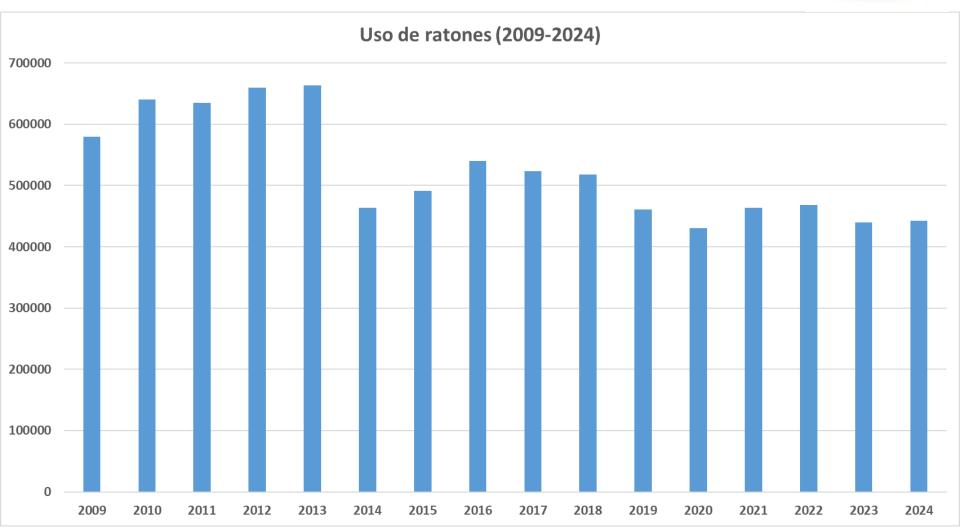

roedores

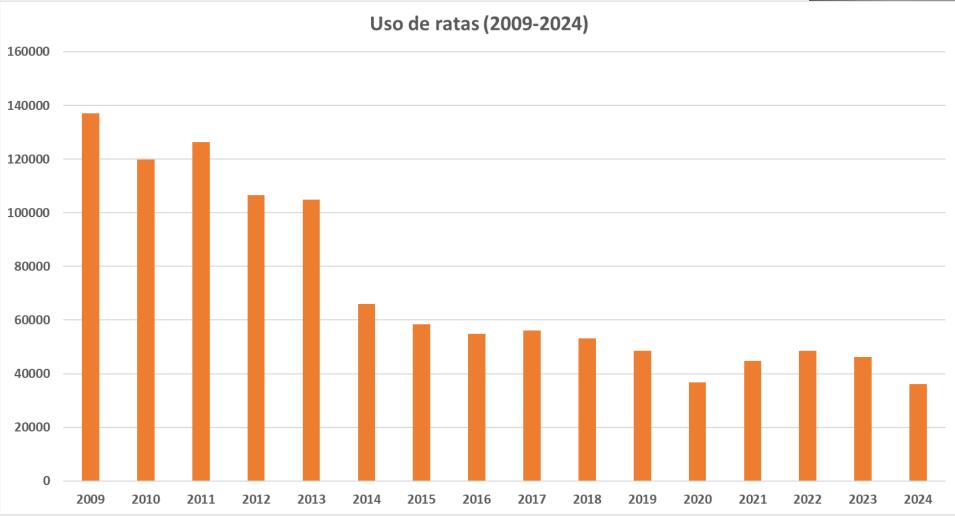

Fuente: MAPA En 2004 el ~91% de los roedores usados fueron ratones (~7% ratas)

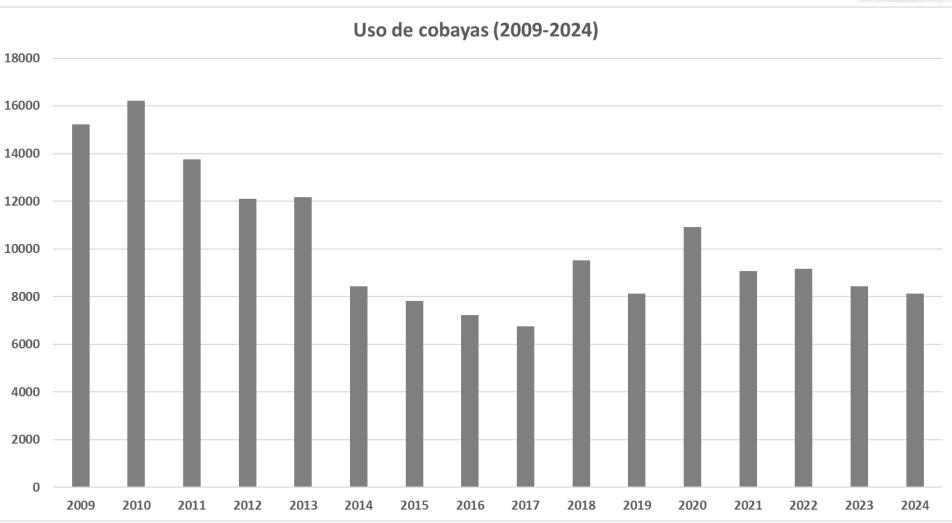

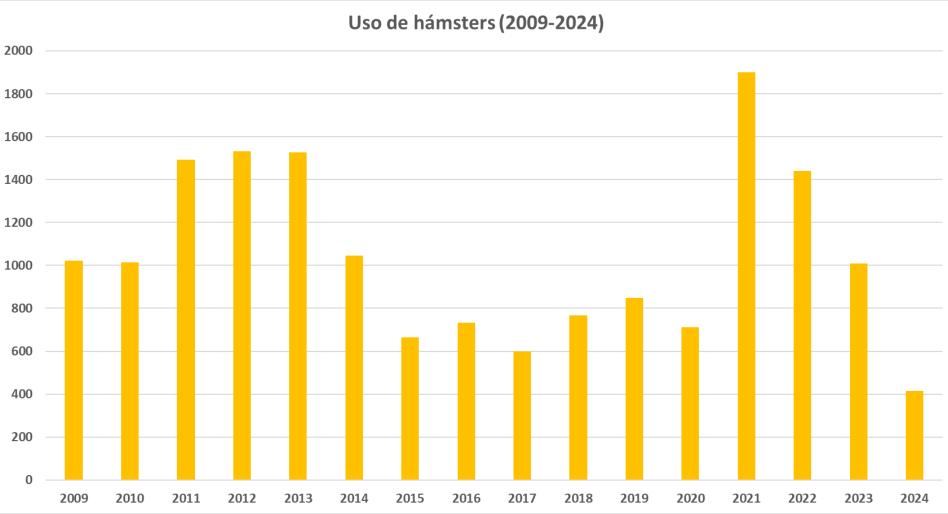

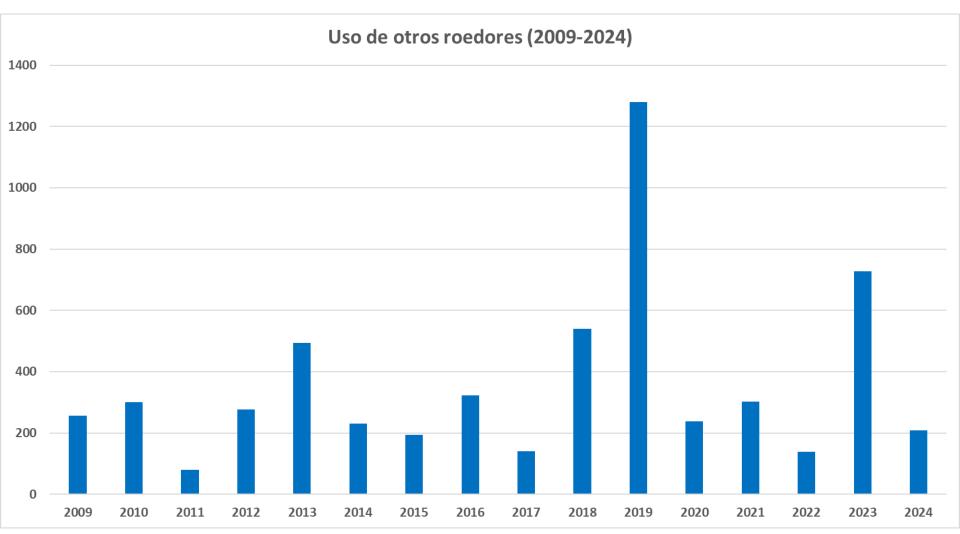

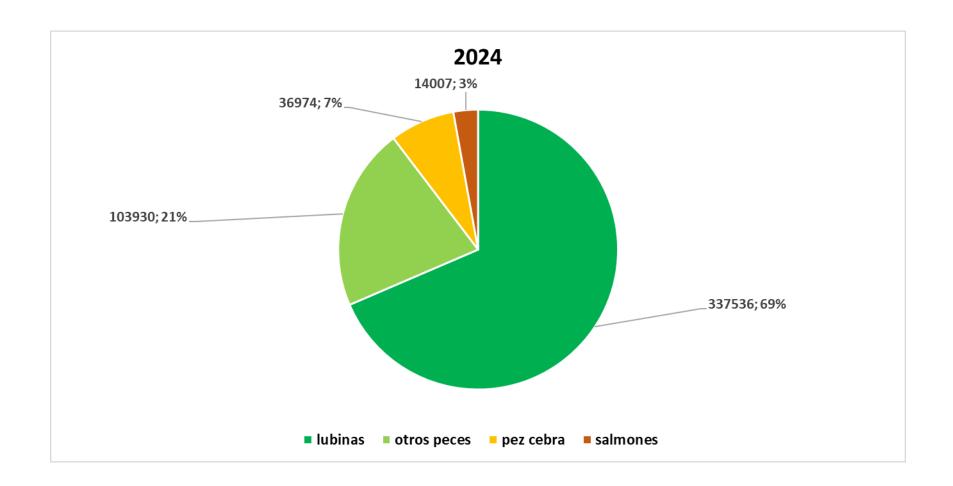

Peces usados en 2024

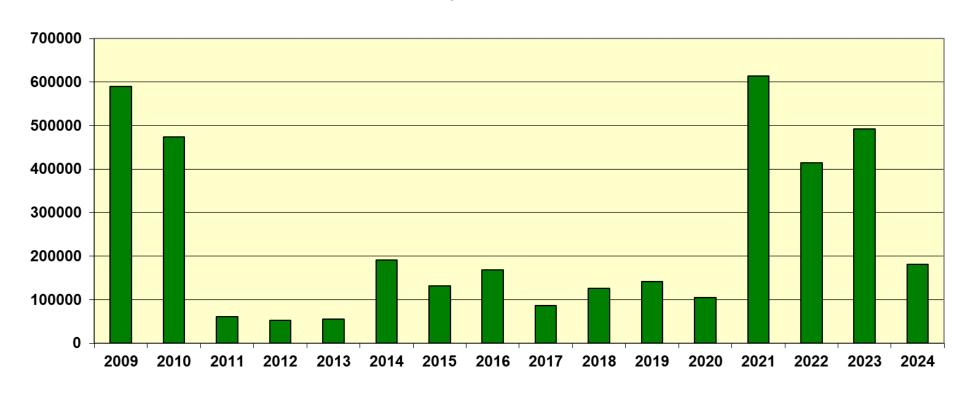

La gran mayoría de peces usados (69%) son "lubinas"

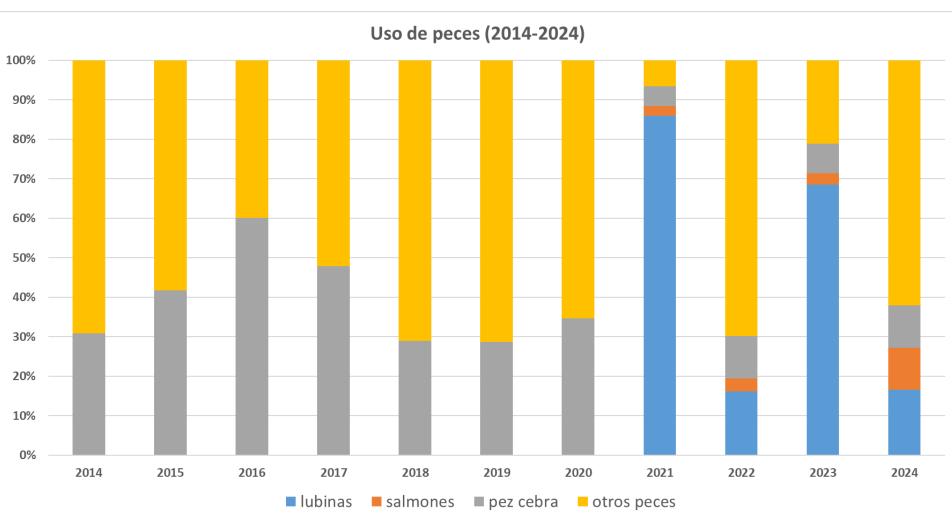

peces

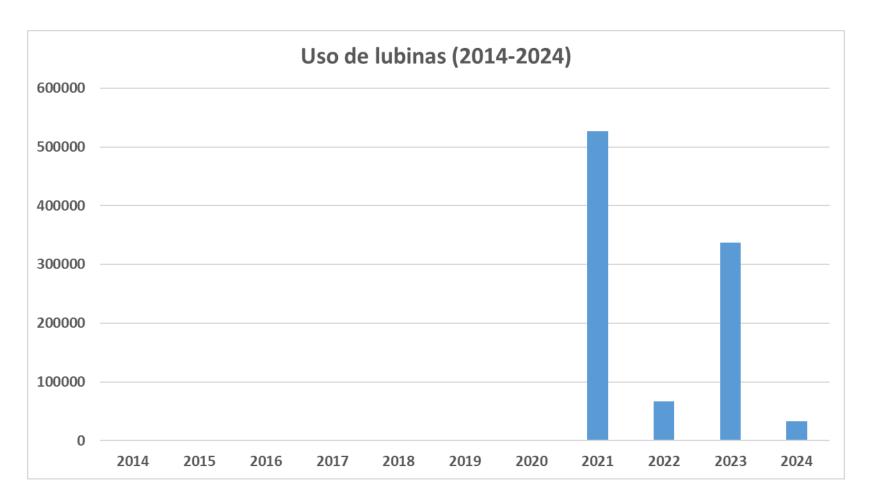

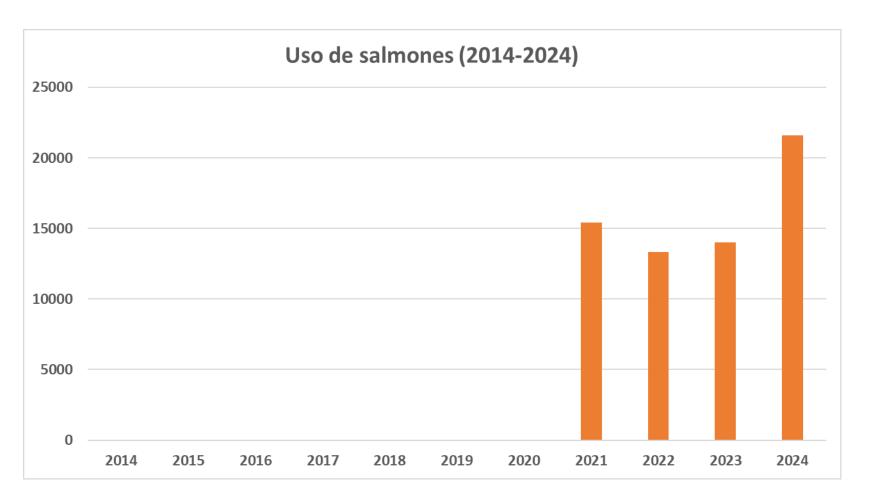

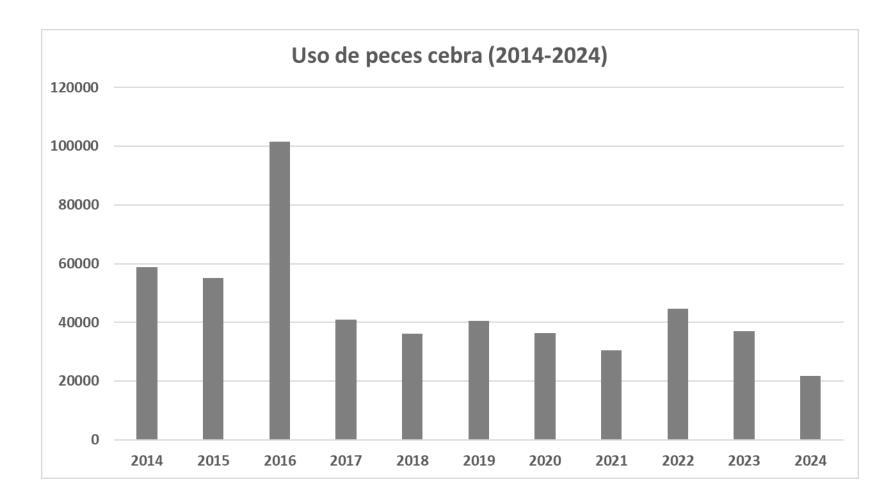

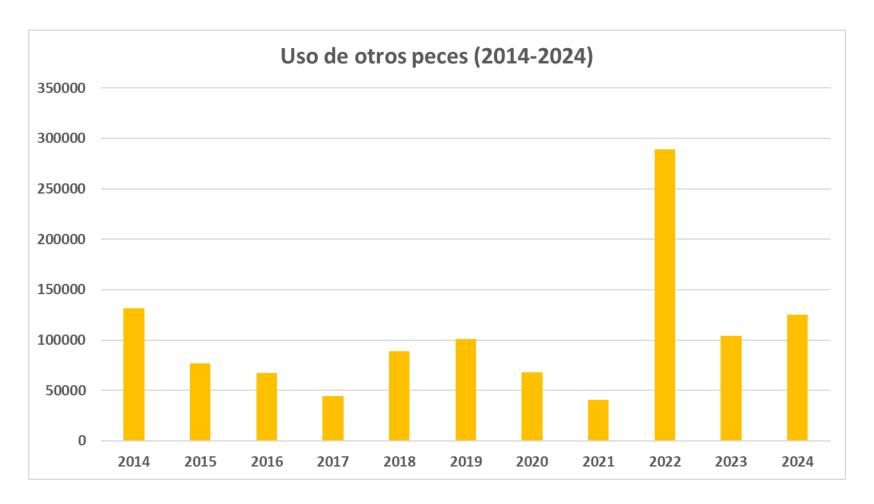

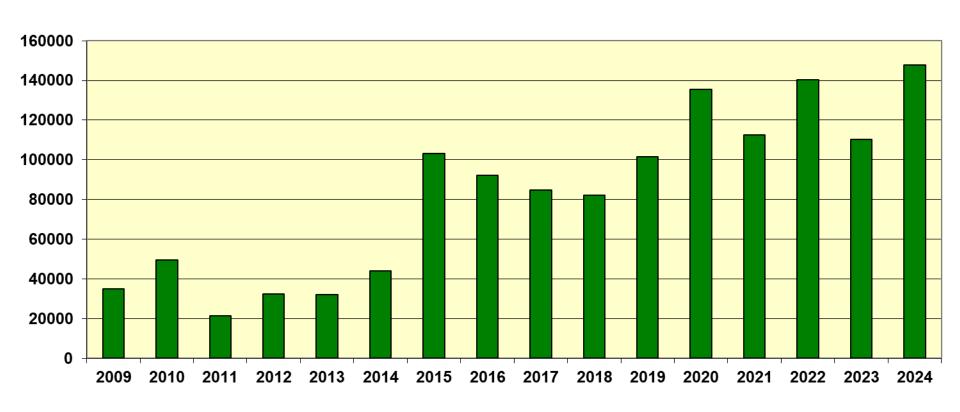

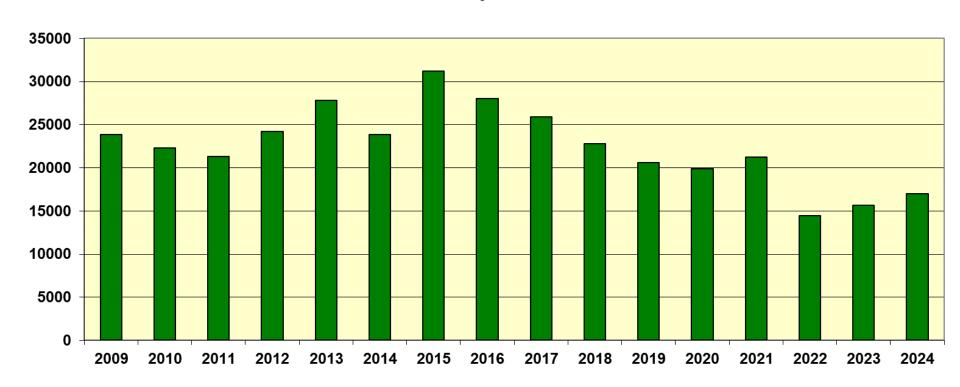

aves

conejos

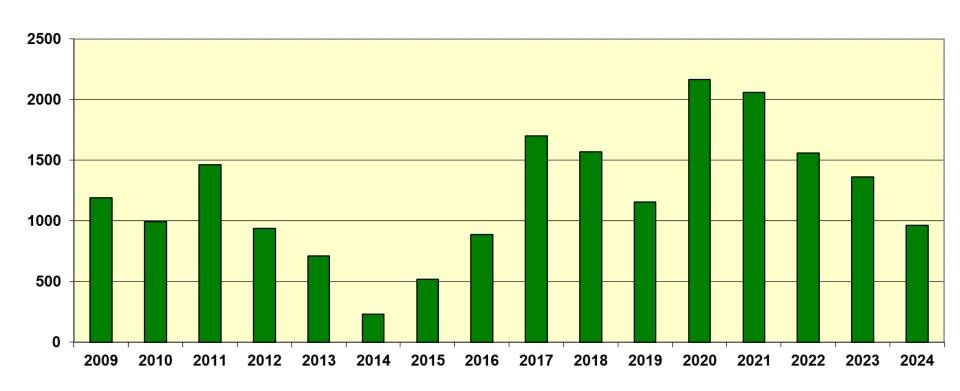

cerdos

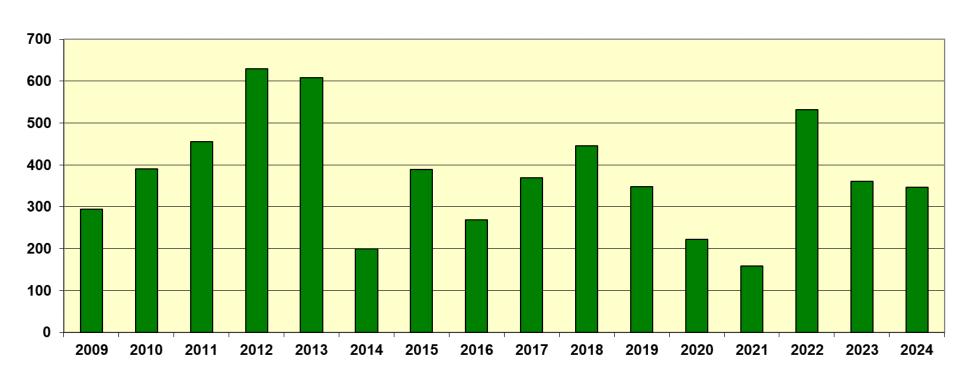

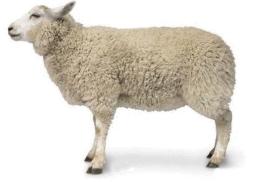

vacas

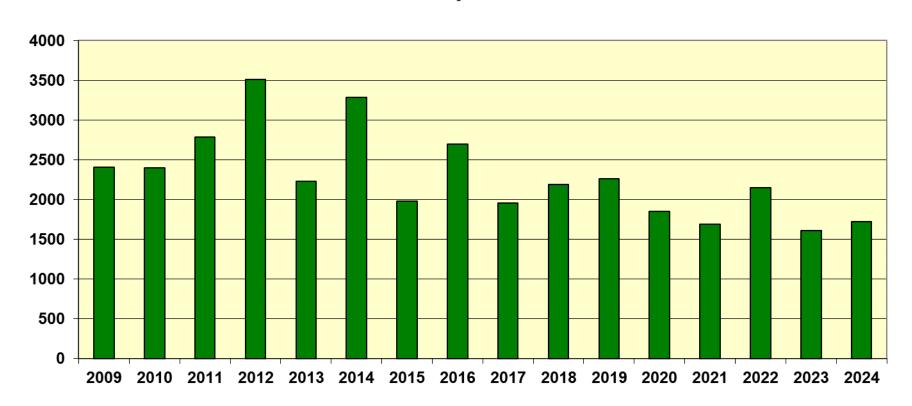

cabras

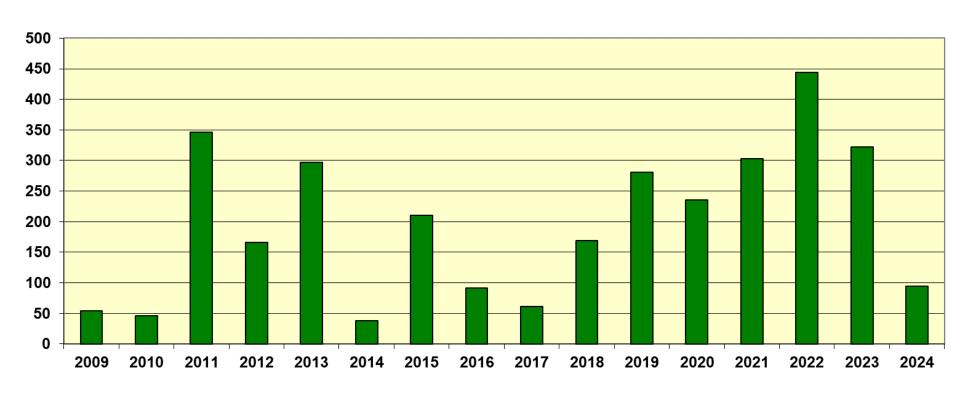

ovejas

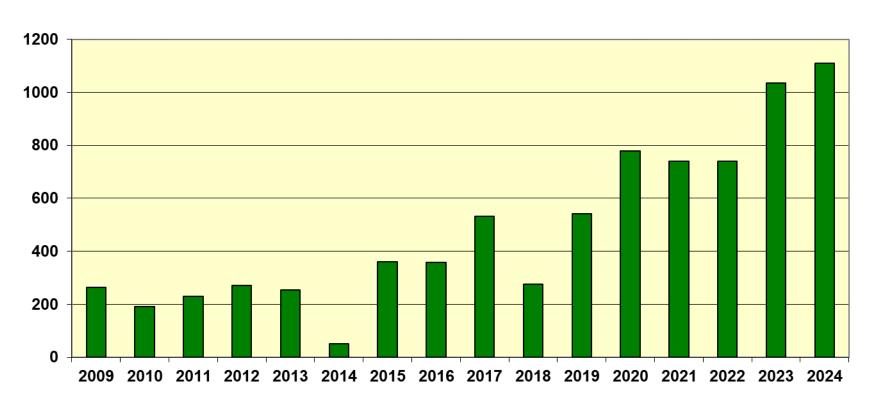

équidos

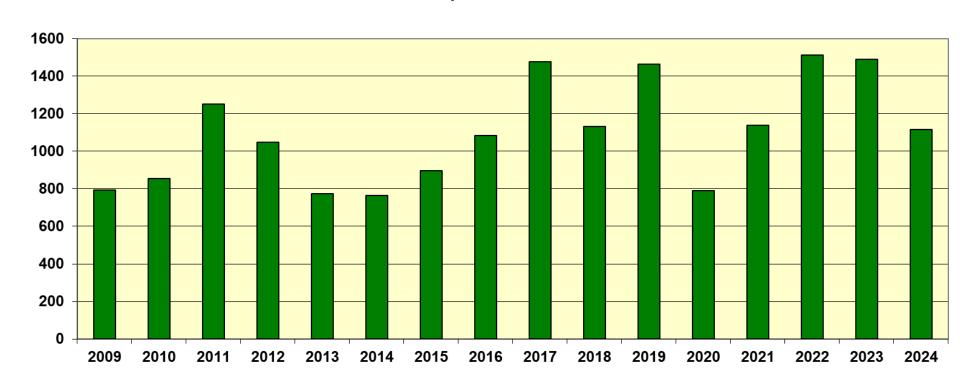

gatos

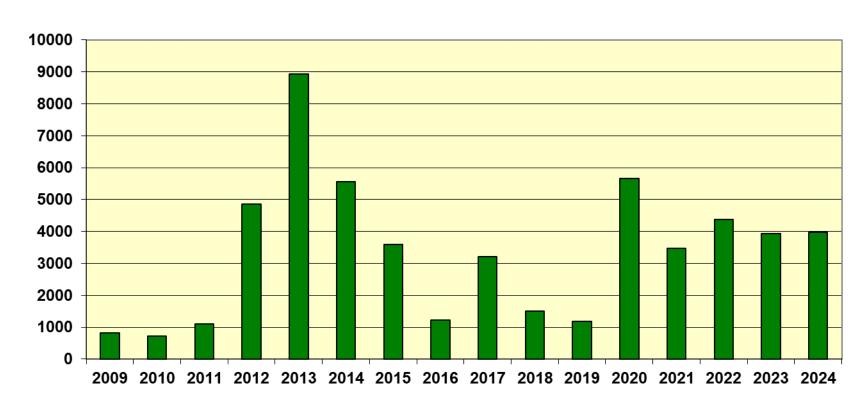

perros

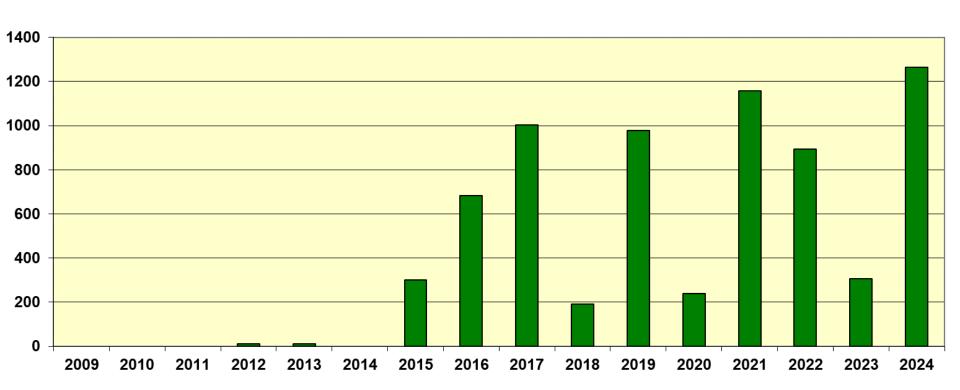

anfibios
